**CAST. AN EXPRESSION OF ORIGINALITY.**

CAST is a look that breathes a unique expression into hardware and interior detailing. It combines the smoothness of a hand-polished solid metal bar with tactile cast knuckles and grips, which reference industrial techniques and oversized, exposed pipework often found in period buildings and factories. The rough and the smooth elements fuse as one to tell a story of materials, and the machines and hands that craft each piece. The casting brings a new dynamic texture to interiors, and each knuckle or grip is a one-of-a-kind original thanks to the process.
